PROFESSIONAL SUMMARY

AI/Software Engineer with 13+ years of experience spanning Android, full-stack web, and cloud-native systems, now focused on production agentic AI at IBM. Builds multi-agent systems with LangChain, LangGraph, and Retrieval-Augmented Generation (RAG) that turn multi-day enterprise workflows into minutes, deployed on Kubernetes with full CI/CD ownership. Has led engineering teams of 20+, mentored 10+ engineers into senior roles, and is an active open-source contributor and technical speaker.

TECHNICAL SKILLS

AI & Agentic Systems	LangChain, LangGraph, RAG, Model Context Protocol (MCP), Agent2Agent Protocol (A2A), Hybrid Search, Vector Databases (Milvus), IBM watsonx, Prompt Engineering
Languages	Python, TypeScript, JavaScript, Kotlin, Java
Frontend	React, Redux, Next.js, Angular, Carbon Design System
Backend & APIs	Node.js, FastAPI, NestJS, REST, gRPC, Microservices
Cloud & DevOps	Kubernetes, Docker, IBM Cloud, AWS, CI/CD (Tekton, GitHub Actions, GitLab CI), SonarQube
Data	PostgreSQL, MongoDB, Redis, SQL

PROFESSIONAL EXPERIENCE

IBM — AI / Software Engineer

Bengaluru, India · Sept 2024 – Present

- Architected and shipped a multi-agent AI assistant (LangChain, LangGraph, RAG) that unifies search across 4+ enterprise documentation and knowledge systems into one cited, natural-language interface, adopted by a 50+ person technical sales organization.
- Designed a second multi-agent workflow that generates complete, multi-section technical proposal documents end-to-end, cutting document preparation time from 2–3 weeks to under 10 minutes, including live cost data.
- Cut agent prompt size 77% and token usage ~40% by engineering a conditional tool-instruction injection system across an 11-agent LangGraph orchestration pipeline.
- Resolved two production-reliability issues: durable multi-day conversation memory via PostgreSQL-backed checkpointing on Kubernetes, and degraded answer quality on keyword-heavy queries via a tuned hybrid dense-vector + BM25 retrieval pipeline (Milvus).
- Led a monorepo migration to a shared-library architecture (8 reusable Python libraries) with automated CI/CD (secret scanning, SAST, image builds, automated rollout), cutting new-service bootstrap time from multiple days to under one.
- Mentored 2 engineers from framework beginners into independent full-stack and agentic-AI contributors; presented platform architecture to IBM's internal engineering community; received IBM's Entrepreneur Award (2026) for measurable accuracy improvements to a production AI system.

HCLTech — Lead Engineer

Bengaluru, India · Apr 2024 – Sept 2024

- Led a team of 10 engineers on full-stack delivery (React, TypeScript, Node.js) for e.on, owning the project roadmap with the product manager and GitLab CI/CD and static-analysis quality gates.

Neetable Technologies — Engineering Manager

Bengaluru, India · Dec 2023 – Mar 2024

- Served as platform lead across the full product stack (React, Next.js, NestJS, Prisma, AWS Amplify) for PhoxHealth, coordinating UX, engineering, and stakeholder delivery.

ARInspect — Engineering Manager (2022–23); Tech Lead, Android (2019–22) India · Nov 2019 – Jun 2023

- Promoted from Android Tech Lead to Engineering Head (May 2022), growing scope from a 5-person mobile team to leading 24 engineers (10 frontend, 7 backend, 5 QA, 2 automation) across web and mobile.
- Planned, designed, and shipped features end-to-end via agile methodology for a field-operations automation platform used by U.S. government agencies.

Simform Solutions — Sr. Android Developer Ahmedabad, India · Jul 2017 – Nov 2019

- Built native Android applications (Kotlin, Jetpack) for SwiftShopper (e-commerce) and FitCom (fitness tracking).

Earlier Experience — LetsNurture & Pixielit Studios Ahmedabad, India · Jul 2013 – Jul 2017

- Android Developer roles progressing to Senior Software Engineer; native Android development, backend services for mobile apps, and training junior developers.

EDUCATION

Master of Computer Applications (MCA) 2013
L.J. Institute of Computer Applications

B.Sc., Mathematics 2010
K.K. Shah Jarodwala Science College

CERTIFICATIONS

IBM Developer Profession – Level 2 (Experienced) IBM, 2026

Deep Agents with LangGraph LangChain Academy, 2025

Claude Academy: Claude, Claude Code, Cowork, Agent Skills, Subagents Anthropic, 2026

COMMUNITY & RECOGNITION

Stack Overflow: ~25K reputation, 400+ answers

Open source: A2A protocol tooling (github.com/iChintanSoni)

Speaker: IBM tech talks, GDG DevFest

Writer: Dev.to, Medium
